Mr. Bryant K. Burnett
Site Assessment Manager
Superfund Division
U.S. EPA, Region VII
726 Minnesota Avenue
Kansas City, KS 66101

Dear Mr. Burnett:

Enclosed, please find a copy of the Site Screening Report for Cape Redi-Mix, located in Cape Girardeau County, Missouri. A copy of the report, figures, and lab analyses are enclosed for your review.

The Cape Redi-Mix site is the location of a now defunct concrete company in Cape Girardeau, Missouri that reportedly went bankrupt in 1986. This site investigation was initiated as a result of a former employee's recollection of using PCB-contaminated waste oil from MEW (a Superfund site) to control dust on the facility.

There were no PCB contaminants detected at this site. If undetected contaminants are in the gravel layer thought to be the parking lot, the potential for exposure is minimal due to the large amount of overlying fill. This site has been inundated by floodwaters several times in the last two decades, and the floodwaters may have carried off contaminants or contaminant-laden soil. The Cape Redi-Mix site merits no further evaluation under CERCLA at this time.

If you have any questions or need additional information, please contact Mr. Scott Hamilton, of my staff, at (573) 751-8629.

Sincerely,

HAZARDOUS WASTE PROGRAM

Julie Warren
